GAME DEVELOPER

TECHNICAL SKILLS

Languages: C#, C++, Python, JavaScript/TypeScript, Java, HTML5/CSS, SQL/NoSQL

Game Development: Unity, Unreal 5

Other Frameworks and Libraries: React, Express, Node, Tailwind, .NET

Operating Systems: Linux & Windows

Tools: Git, BitBucket, Figma, Blender, Photoshop

EMPLOYMENT HISTORY

Student Software Developer(Co-op) | Centennial College, Toronto, Canada Sept. 2024 – Dec. 2024

- Laid the groundwork in front-end for the OER's student website through Figma, React and Tailwind.
- Ensured every project followed correct accessibility guidelines through HTML coding practices, font choice and color palettes.
- Spearheaded the development of an interactive 3D gearbox physics simulator using Unity for Centennial's Department of Transportation.
- Worked with various departments within Centennial to develop 3 OER books using Pressbooks and H5P.
- Streamlined several design aspects for the visual language of Centennial's OER books, saving up to 20% in development time.
- **Skills:** JavaScript, React, CSS, Unity, Figma, Tailwind, Graphic Design, Accessibility.

Game Programmer | Sagittaras Games, Czech Republic (Remote) Aug. 2023 – Aug. 2024

- Helped overhaul the UI, troubleshoot bugs and added new features for the game *VectroBlast* for their upcoming 1.3 expansion.
- Worked alongside an experienced team as a SCRUM developer through Slack & Jira and helped in the management of their robust Confluence site.
- Developed & tested various features through unit test cases saving crucial development time.
- Programmer for *MMORPG Spellborn* game, successfully participating in 2 hackathons relating to it.
- **Skills:** OOP, UI Development, Agile, Jira, Debugging, Git, Unity, Unit Testing

Game Developer & Sound Designer (On-Call) | ToasterWorks, Canada April 2023 – December 2025

- Contributed to various technical documents necessary for the development process such as GDDs, UML Diagrams and more.
- Provided feedback on the design of the combat system, narratives and other mechanics.
- Composed 12+ musical tracks and designed various sound effects for the game.
- **Skills:** Unity, Music Composition, Graphic Design, Game Design, BitBucket.

PROJECT HIGHLIGHTS

'Manafuse' – Capstone Game Development Unity Project

- Planned and developed a 2.5D top-down action shooter game in Unity as the team lead.
- Followed agile principles throughout the development with a team of five.
- Implemented a versatile and readable code-base with a modular architecture that relied on clear, hierarchical one-way communication centered around a service locator.
- Prototyped various game-play mechanics including as a deck system, movement system and replaceable attacks.
- Responsible for all UI elements such as the joint mana/health bar system and a re-loadable revolver chamber with attacks.

'Harmonic Rhythm' – One-Button Rhythm Game About Scale

- Made for GMTK's 2024 Game Jam for 96 hours, participated as the main programmer.
- Completed a polished rhythm game with two mini-games, an interactive tutorial system and a playable Windows and WebGL build.

ACADEMIC / OTHER PROJECTS

- 2 Other Game Jam Projects (Detective Visual Novel & Puzzle Game) • Into The Abyss (3D Ocean Photography Exploration) • Hull Breach (Isometric Tower Defense) • Orbital Runner (Super Monkey Ball-Like) • 9th Planet (On-Rails Space Horror Game) • RGWS-PWA (Robotics Project with Pepper)

VOLUNTEER WORK

Game Course Developer | LATIR Foundation, Bogotá, Colombia Jan. 2021 – June 2021

- Planned an introductory course of Game Development for low-income high school students.
- Developed course materials in JavaScript through the WebGL Game Engine PlayCanvas.

EDUCATION

Games Programming (Co-op) Advanced Diploma (Fast-Track) Jan. 2024 – Dec. 2025
Centennial College, Toronto, ON GPA: 4.0 (A).

Focus Areas: Game Project Development | Game Design | Object Oriented Programming | Software Systems Design | Web Application Development | Testing & QA | IT Project Management | Advanced Graphics | Mobile Development | Data Structures | C++

Bachelor of Science Degree – Computer Science June 2017 – Dec. 2022
Pontificia Universidad Javeriana, Bogotá, Colombia

- Received equivalency assessment for a Bachelor of Science in Canada, via World Education Services.
- Specialized in Graphics Programming.

PROFESSIONAL DEVELOPMENT

Agile Explorer | IBM (Remote) May 8th – 2025
Associate Unity Programmer Certificate | Unity (Remote) Dec. 2023 – April 2023
Intro to Game Design & Narrative Course | CalArts – Coursera (Remote) Dec. 2023 – April 2023
